EXPERIENCE

Full Stack Developer(ReactJS, ExpressJS).

Voltus(U.S.)

July 2019 - June 2022

Odessa, Ukraine

Domain: Energy Industry

- Built landing page by using **ReactJS** to optimize SEO performance and **Material UI** to customize a responsive and eye-catching Landing Page.
- Refactored class component into **React hooks** framework for faster development.
- Applied Flux Architecture with **Redux Store** to make application scalable.
- Used Git for version control system and implement CICD pipeline with various workflows in **Github**.
- Developed an Endpoint API with **ExpressJS** which allows brokers to update schedule, site and Telemetry
- Worked with AWS for Cloud integration and used services like Amazon EC2, AWS Amplify, AWS Lambda, Amazon Cognito, Amazon SQS, SES, SNS and many others.
- Worked in **Agile Methodology**, with 7 team members. Used Clickup for task management

Full Stack Developer(ReactJS, Ruby on Rails).

Sleek(Hong Kong)

January 2017 - April 2019

Hong Kong

Domain: Fintech Industry, E-commerce Industry

- Sleek is outsourcing company and help entrepreneurs to build successful business
- Built front ends of many websites according to customer's requirement with **React, Angular, Vue, Shopify** but my main and favourite stack is React
- Also used **Ruby on Rails** for SaaS application, and integrate React and Ruby on Rails for File Management Systems
- Worked with AWS services like Amazon EC2, Amazon EBS, AWS Lambda.
- Used **GitLab, GitHub, BitBucket** for version control system and used **Jira** for task management.
- Worked with several international teams and mainly used **Scrum methodology**

Front End Developer(ReactJS).

Central Business Information Limited

August 2014 - December 2016

Hong Kong

- Started as a junior front end developer focused on javascript frameworks and libraries
- Used ReactJS, AngularJS, pure JQuery for front end development
- Mainly developed web pages according to figma, xd design and implemented some user actions, animations and some front end logic
